PROFESSIONAL SUMMARY

Versatile Senior Software Engineer with over 8 years of experience building high-throughput microservices, scalable cloud platforms, and user-centric interfaces. Demonstrated success in leading cross-functional developer teams, optimizing data pipelines, and architecting distributed enterprise systems.

PROFESSIONAL EXPERIENCE

Lead Systems Architect — Apex Cloud Solutions

2021 – Present
Enterprise Infrastructure Group
San Francisco, CA

- Architected cloud-native event streaming infrastructure processing 15M+ daily events using Kafka and Go.
- Directed a team of 6 engineers, reducing deployment failure rates by 40% through enhanced CI/CD automation.
- Spearheaded database refactoring initiatives that decreased peak query latency by 65%.

Senior Full-Stack Engineer — DataPulse Labs

2018 – 2021
Product Engineering Division
Austin, TX

- Developed real-time analytics dashboards using React, TypeScript, and GraphQL consumed by 50k active users.
- Migrated legacy monolithic services to Dockerized Kubernetes clusters, cutting server overhead by 25%.
